

EVEDY™

COMPLIANCE

We Control AI

Can you trust your AI?

Every second AI project will fail

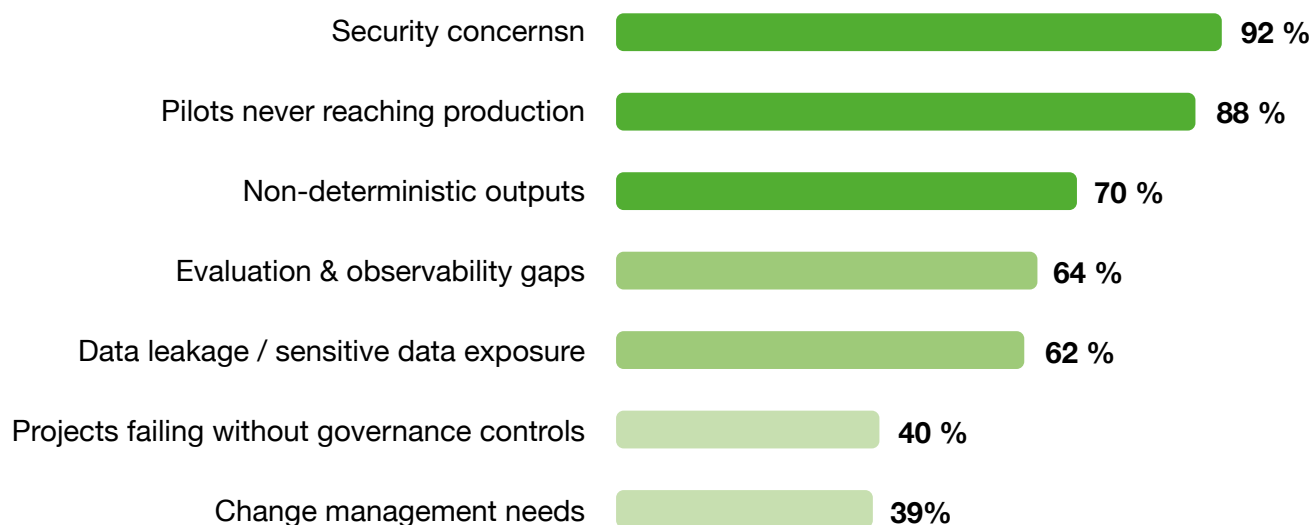

The reasons are known – and measurable.

50 % of all AI projects
will fail by 2027

Enterprises are investing heavily in AI agents. Yet analysts expect half of all AI projects to fail by 2027 – not because of the technology, but for lack of control.

The biggest hurdles enterprises face with AI agents (2026)

Share of enterprises / leaders citing this as a top challenge

Security concerns, pilots that never reach production, unreliable outputs: the three biggest hurdles have one thing in common – they cannot be solved with more AI.

**Companies don't need more AI.
They need more control over AI.**

Six controls. One platform.

The EVEDY AI Control Suite.

The EVEDY AI Control Suite monitors, audits and governs the use of AI across your organization – at runtime, automated and transparent.

Six modules working as one:

1 IAM integration & AI security

Only authorized access to your data. Detects jailbreaks and prompt injection instantly.

2 PII Data protection

Automatically redacts personal data – even when it comes straight from the caller.

3 Governance & change management

Manages LLMs and agents with testing, evaluation and observability of every new version.

4 Data accuracy & compliance enforcement

Automatically applies regulations and company policies, flagging non-compliant and non-deterministic outputs.

5 Token & cost control- transparent ROI

A single control plane makes savings, productivity gains and economic impact measurable.

6 Audit trails

Complete traceability of every AI interaction – by user, by agent, by regulation.

Deploys easily via API proxy & Integrates seamlessly with your existing LLM gateways

The result: AI that scales safely – with risks under control and provable economic value.
